## Pangean Technologies announces the beta version of its VoWiFi Push to Talk solution for handheld devices

New York, N.Y. – September 13, 2006, Pangean Technologies, experts in instant communications solutions for the enterprise market, today launched the beta version of Y-Talk, Pangean's VoIP mobility solution for internal instant communications.

Y-Talk is a SIP-based software application that transforms any handheld device running Microsoft Windows Mobile™ 5.0 into a "Walkie-Talkie" like device using Push to Talk. Enterprises with the need for a ubiquitous solution that increases employee mobility and productivity while reducing costs for internal communications can use Y-Talk for instant communications "on the go".

Derived from Pangean's award-winning *insta*-REACT! solution, the new solution combines Voice over IP (VoIP) and Wireless Fidelity (WiFi) technologies to provide Push to Talk capabilities on handheld devices for instant communications within a campus network or across multiple corporate sites.

"We recognized the need to bring to market a solution that will transform the way the mobile workforce communicates in environments where internal instant communications are critical, such as the retail and warehouse environments", said Tarun Kapoor, CEO of Pangean Technologies. "We believe that Y-Talk offers a unique solution for enterprises needing the ability for mobile employees to instantly communicate with team members and groups of colleagues at the push of a button. By leveraging the existing WiFi infrastructure, in-building communications can be readily achieved with very little, if any, infrastructure investments. "

Pangean has also partnered with Symbol (SBL-NYSE) to integrate Y-Talk on Symbol's MC70 and MC9090 (and soon MC50) Enterprise Digital Assistants (EDA).

To read an interview with Tarun Kapoor and find out what analysts are saying about the Y-Talk solution, please visit [http://mrtmag.com/mag/radio\\_push\\_totalk\\_comes\\_enterprise/index.html](http://mrtmag.com/mag/radio_push_totalk_comes_enterprise/index.html) and to find out more about Y-Talk and request a copy of the beta version, please visit <http://www.pangeantech.com/ytalk.php>.

### **About Pangean Technologies**

Pangean Technologies develops and markets innovative, SIP-based, VoIP software applications for internal and campus-wide communications for the enterprise market. These cost-effective, open-system solutions leverage an existing corporate IP network by delivering efficient communications services to each user's desktop or handheld device.
